

ICAO Crisis Management Workshop

Workshop Aim

This workshop is designed to equip participants with the knowledge, skills and attitude required to respond effectively to major aviation security incidents by developing key elements of a Crisis Management Plan and participating in tabletop exercises, while strengthening coordination and cooperation among all aviation security stakeholders to safeguard civil aviation against acts of unlawful interference

Who should attend

- Aviation security managers, inspectors, crisis management coordinators, and members of national aviation security committees responsible for oversight, planning, and coordination of aviation security incident response.
- Airport emergency response and security managers, airline security and emergency coordination staff and crisis management teams.
- Government and supporting response agencies.

Entry Requirements

- Background in aviation and/or security operations
- Personnel responsible for incident response planning, emergency coordination, security operations, or crisis management functions within their organization.
- Ability to communicate effectively in English
